

 **AMARA** Amrutam

# Multiply Your Crop Yield With Mitti Amrutam

 [amaragroup.in](http://amaragroup.in)  [info@amaragroup.in](mailto:info@amaragroup.in)

# Amara Amrutam: Mitti

Get a guaranteed increase in crop yield and quality with our unique all **natural** micronutrient mixture for foliar application.

With a large chunk of soil in the country being rendered deficient in micronutrients, crops have stopped responding to fertilizers. Mitti Amrutam is a liquid ionic concentrated mineral fertilizing water that is an **eco-friendly** production of seawater used to increase the concentration of plant **minerals** in ionic form.

## Benefits of Mitti Amrutam

- Natural formulation
- Environmentally friendly
- Low cost technology
- Applicable on all types of crops
- Increases crop production
- Improves plant vigor
- Reduces fertilizer, pesticide and herbicide usage
- Reduces water usage
- Promotes fine root growth
- Improves soil pH
- Helps in seed germination
- Improves nutrient content and shelf life of produce
- Reclaims saline and sodic soils
- Ripens crops earlier than normal
- Decreases plant disease rates

**For usage directions,  
see next page**

**For best results,  
Mitti Amrutam and  
Suraksha Amrutam  
are advised to be  
used together**

Follow these steps for safe and easy application of Mitti Amrutam and Suraksha Amrutam:

1. Mix 5 ml in one litre of water
2. Initially administer in the soil or seed bed at the time of sowing
3. Follow up applications should be made every 12-15 days using a foliar spray

Note:

- For 1 acre, you will require 4 bottles of Mitti Amrutam and Suraksha Amrutam each for a single foliar spray.
- For a 2 month period, you will require 20 bottles of Mitti Amrutam per acre
- For an entire season, you will require 8 bottles of Suraksha Amrutam per acre

Trial Method:

1. Soak seeds for 12 hours in a solution of 5% Mitti Amrutam and 95% water
2. Sow the seeds
3. When the plants grow 3-4 inches, spray them with the first foliar spray of Mitti Amrutam
4. After 12-15 days, spray the leaves of the crops with Mitti Amrutam and Suraksha Amrutam
5. After 12-15 days, spray the leaves of the crops with Mitti Amrutam
6. After 12-15 days, spray the leaves of the crops with Mitti Amrutam and Suraksha Amrutam
7. After 12-15 days, spray the leaves of the crops with Mitti Amrutam
8. After 12-15 days, spray the leaves of the crops with Mitti Amrutam and Suraksha Amrutam
